**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following is required under 35 U.S.C. 121:

This application contains claims directed to the following patentably distinct species of the claimed invention:

A). Agents: (as recited in claim 8. Note that a species that falls within the generic group is required. Extracellular matrix proteins are a genus. A species of this protein is required for a proper election.)

1. Extracellular matrix proteins
  2. Extracellular matrix protein fragments
  3. Peptides
  4. Growth factors
  5. Cytokines
- B. Data acquisition as recited in claim 9.
1. Immunocytochemistry analysis
  2. Microscopy
  3. Functional assays
- C. Biological response as recited in claim 10.
1. Cell adhesion
  2. Cell survival

3. Cell differentiation

4. Cell maturation

5. Cell proliferation

D. Statistical design as recited in claim 15.

1. Fractional factorial design

2. D-optimal design

3. Mixture design

4. Plackett-Burman design

E. Agent-immobilizing material as recited in claim 4.

1. Hyaluronic acid

2. Algenic acid

3. PEO

4. PHEM

Each of the species covered in each of the genus in e.g., A differs in structure and mode of action. A prior art reference anticipating one species would not render obvious the other species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. A proper election of species is electing one species (not the genus as grouped above) from A, one from B, one from C, one from D and one from E. Currently, 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1639

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
